To make your water safe, we recommend:

1. Boiling water

OR

2. Bleach

1. Boiling Water

Your stored water may be unsafe to drink.

**Boil your water before use, either:** Bring the water to a rolling boil for one minute, or boil the kettle or jug until it switches off automatically. *If you can’t boil your water, you’ll need to disinfect it with bleach.*

2. Bleach

**Drinking**

For drinking, cooking and brushing teeth:

Ensure bleach is plain and unscented. *(Don’t use Janola as it contains detergents which makes it unsuitable for treating drinking water)*.

- add **½ tsp** Bleach
- add **5 drops** Bleach

</tr>
</thead>
</table>

| 1 litre of Water |

**Cleaning**

For general cleaning (dishes and hard surfaces) use:

- **1 tsp** 1 litre
- **¼ cup** 10 litres

Bleach Water

For heavy cleaning (floodwater, toilets or illness) use:

- **¼ cup** 1 litre
- **2 cups** 10 litres

Bleach Water
